

AISSMS College of Engineering, Pune Visits Saipro Group's Mumbai International Cruise Terminal (MICT) Project.

October 21, 2024 | Press Release | Saipro Infrastructures, Mumbai.

On October 21, 2024, Saipro Group had the honour of hosting an educational visit for 99 fourth-year civil engineering students from AISSMS College of Engineering, Pune, accompanied by 7 faculty members. This insightful tour of the prestigious Mumbai International Cruise Terminal (MICT) Project gave the students a valuable opportunity to experience one of India's most advanced maritime infrastructure developments.

A Unique Learning Opportunity

The visit provided a rare and exclusive opportunity for the students to access the high-security Mumbai Port premises, which are typically restricted to the public. Guided by Saipro Group's engineering experts, the students received in-depth insights into the MICT project, with a focus on both the civil and facade engineering divisions. The tour enabled the students to witness firsthand the scale and complexity of such a large-scale infrastructure project, bringing their classroom learning to life.

Insightful Discussions and Knowledge Sharing

Saipro's experienced engineering team conducted detailed sessions, explaining the intricate details of the project and addressing various aspects such as structural design, materials used, project management, and construction challenges. The students engaged in interactive discussions, deepening their understanding of how a world-class cruise terminal is designed and constructed.

Memorable Takeaways

The students and faculty were highly appreciative of the opportunity to explore the MICT project. They expressed gratitude for the experience, which provided valuable insights into real-world engineering practices, and left with a deeper understanding of the complexities involved in executing a major infrastructure project.

A Special Token of Appreciation

As a gesture of appreciation, AISSMS College of Engineering presented a memento to Mr. Sahil Kale, Director of Saipro Group, thanking him and the company for facilitating the educational visit. This token of gratitude symbolised the strengthening of ties between academia and industry, and highlighted Saipro Group's role in promoting learning and growth for aspiring engineers.

About Saipro Group

As the EPC contractor for the iconic MICT project, Saipro Group continues to play a pivotal role in the construction of India's first world-class cruise terminal. Our commitment to innovation, precision, and engineering excellence has positioned Saipro as a leader in the industry, and the MICT project stands as a testament to our dedication to building a stronger and more connected future for India's maritime industry.

This visit reflects Saipro Group's ongoing commitment to nurturing the next generation of engineers and promoting practical learning experiences. We look forward to more such collaborations with educational institutions in the future.

Stay tuned to Saipro Group's Newsroom for more updates on this exciting project and our ongoing initiatives.
